THE LIVING MATRIX

The New Science of Healing

Documentary Film Reveals Latest Research in Alternative Healing and Challenges Conventional Medical Understanding of How We Heal

Featuring: Lynne McTaggart, Dr. Eric Pearl, Bruce Lipton PhD, MD, Marilyn Mandala Schlitz PhD, Dean Radin Ph.D, Adam Dreamhealer, Rupert Sheldrake, Ph.D and more...

SAN FRANCISCO, CA (December 1, 2009)—Mind, intention, belief...can these factors influence healing? How do placebos work? Can science explain “miracle” cures? A ground-breaking new film, THE LIVING MATRIX—THE NEW SCIENCE OF HEALING (Beyond Words), addresses these questions and explores how quantum physics, energy fields, and consciousness directly affects our health and well-being. For the first time leading scientists, researchers, and holistic practitioners share the latest science and alternative concepts that are revolutionizing healthcare as we know it. The film premiered to sold out audiences in London and Los Angeles and is now available on DVD.

THE LIVING MATRIX is a provocative, full-length feature documentary on healing and the nature of human health. The film uncovers innovative breakthroughs and discoveries that will transform your understanding of how we heal. The most significant revelation is how energy and information fields are as influential as genetics in determining human health, physiology and biochemistry. The film illustrates the undeniable benefits of integrating alternative healing modalities into conventional healthcare and advocates shifting from a disease centered system to a healing centered model.

“Western medicine excels at emergency medicine but falls short in treating chronic or terminal illness,” states San Francisco-based filmmaker Greg Becker, “I found myself suffering from chronic fatigue syndrome, and the traditional Western path didn't offer any

--more--
remedies other than bed rest. I began looking around at different alternative resources, trying to understand what the possibilities were. I recovered through using bio-energetic therapy and I wanted to explore how and why energy and informational medicine work. I wanted to bring a message of hope and choice to people.” Becker partnered with his wife Producer Susan Becker and Executive Producer Harry Massey, an entrepreneur in bioenergetics and informational healthcare in Poole, England, on the making of the film.

Energy healing, placebos, intention experiments, thought field therapy, heart coherence, Informational Medicine, Neuro-Linguistic Programming --are just some of the topics explored in THE LIVING MATRIX. The film features distinguished experts such as Bruce Lipton, MD, PhD, author of The Biology of Belief; Edgar Mitchell PhD, US Astronaut, Founder of Institute of Noetic Sciences; Rupert Sheldrake, PhD, author of A New Science of Life and Rollin McCraty, Director of Research, Institute of HeartMath; Lynne McTaggart, author of The Field and The Intention Experiment; Marilyn Mandala Schilitz President of IONS and more.

The film also shares compelling true stories of people who recovered from chronic illness – including a five-year-old boy born with cerebral palsy, an osteopathic doctor with a brain tumor, and a Midwest housewife bedridden with chronic fatigue syndrome. Leading researchers and health practitioners uncover the scientific theories behind these “miracle cures” and indicate how these concepts affect the future of healthcare. Stunning 3D animation and graphics take viewers on a journey deep into the structure of the human body to illustrate how quantum biology influences health.

THE LIVING MATRIX film provides a comprehensive yet inspiring and accessible overview of the science that is proving the human mind can influence our health and that we are more powerful than we have ever imagined.

The Living Matrix—The New Science of Healing (running time 83 minutes) is now available on DVD for $19.95 for more information please visit: www.thelivingmatrixmovie.com
